

Recycling in Saskatchewan

- Paper Depots

This slide includes a title "Recycling in Saskatchewan" and a small icon of recycling bins. It features three photographs: two showing outdoor paper depots with large piles of paper and cardboard, and one showing a blue recycling bin with a recycling symbol on it.

Recycling in Saskatchewan

- Deposit Programs

This slide features a title "Recycling in Saskatchewan" and a small icon of recycling bins. It contains a flow diagram with three images connected by green arrows. The first image shows several beer bottles. The second image shows a green recycling bin filled with bottles. The third image shows a person working at a recycling station.

Recycling in Saskatchewan

- Curbside Programs/dual stream

This slide includes a title "Recycling in Saskatchewan" and a small icon of recycling bins. It features three photographs: one showing blue recycling bins at a curbside location, one showing a recycling truck, and one showing a recycling facility with workers.

Recycling in Saskatchewan

- Single Stream

This slide features a title "Recycling in Saskatchewan" and a small icon of recycling bins. It contains a diagram illustrating the single stream process with three circular images connected by a red arrow. The first image shows a blue recycling bin, the second shows a row of blue recycling bins, and the third shows a recycling bin on a street.

Why Single Stream?

- Convenience

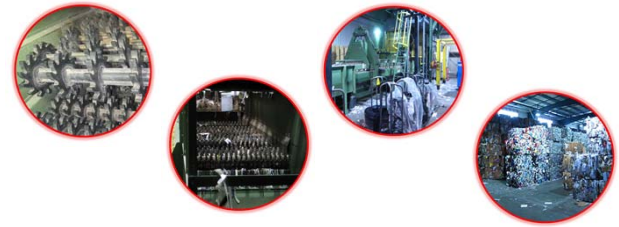

This slide includes a title "Why Single Stream?" and a small icon of recycling bins. It features three photographs showing people interacting with recycling bins: one person is putting items into a bin, another is standing next to a bin, and a third shows a bin on a street.

Why Single Stream?

- Collections are safe and easy
- Cost effective

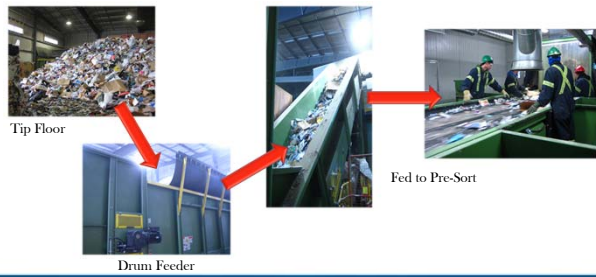

Why Single Stream?

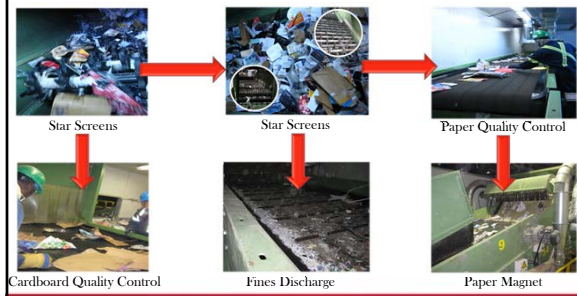

- New technology allows for greater economies of sale

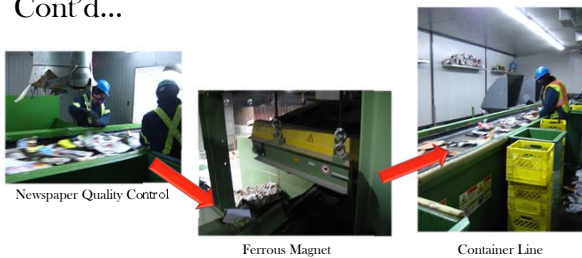

How Does It Work?
